3. one of the biggest lakes in the world.
4. a fresh water animal.
5. a lake with an island in the middle.

- A. The Great Lakes are a group of lakes in the mid-east area of North America bordering Canada. Lake Superior is not only the largest of the Great Lakes but also the largest freshwater lake in the world by surface area. It contains more water than the other four lakes combined. So much water, in fact, that it could cover the whole of North and South America with one foot of water.
- B. Lake Michigan is the only one of the five lakes to be completely located inside the United States, the other four lakes are shared by the U.S. and Canada. Technically, it is the same lake as Lake Huron as they are linked by the Strait of Mackinac. The word "Michigan" comes from the native American word *michi-gami*, which means 'great water'.
- C. Lake Huron is the eastern part of Lake Michigan-Huron. It was actually the first of the Great Lakes to be discovered by European explorers. One of the most interesting features of the lake is Manitoulin Island, which is the largest freshwater island in the world.
- D. Lake Erie is the shallowest of the five lakes, its average depth is only 19 meters. It is the largest freshwater fishery in the world, boosting the economy by over 1 billion dollars every year. People from all over the world come to Lake Erie to fish.
- E. Lake Ontario is the last on the Great Lake chain and serves as the outlet to the Atlantic Ocean. Throughout its history there have been 50 people who have swum across the lake. The very first person to accomplish this was 16-year-old Marilyn Bell in 1954. The youngest person to make the swim was 14-year-old Annaleise Carr. In 2012 she crossed the 52 kilometers in under 27 hours.

FOOD, DANGEROUS FOOD

Tired? Want something to drink? Get a Coke or another fizzy drink and feel the effect on your mind and body!

We all do it, but for many English school kids, this is breakfast. More than 50 000 children who are 8-10 years old don't eat anything in the morning and come to school tired, empty and irritable. And what are the hopes for healthy eating at school? Many schools now have a canteen where kids have a choice. And so they decide to take pizza and chips instead of salad and fish. When you are young, you think you will never die and don't care about 'adult' problems like obesity (being extremely fat) and heart disease.

The Heart Foundation has just started a campaign to show that bad eating habits from our childhood are often the most important causes of heart problems when we are older.

Modern eating habits are very destructive. Today's children are in more danger of heart diseases and some form of cancer than their parents and grandparents. They also have to decide which food to choose, genetically modified or organic. In Britain today, the second option is becoming more and more popular.

So where do we start if we want to eat in a healthy way? First, we should eat normally but do a lot of physical exercises. It is very hard to keep to a diet, and it's all too easy to start getting fat again. The best idea is to exercise in the morning and not to eat snacks, especially late at night! Second, if you eat meat, chicken and fish are much better than red meat. They're good for your body and mind, too.

Third, we should remember that fizzy drinks, tea and coffee are all 'diuretics' which means that they take water away from the body. Fizzy drinks also reduce the amount of healthy substances which the body can take from food. So if you suffer from headaches or general lack of energy, try putting away all those drinks and having lots of water instead. Sometimes your skin gets clearer and your eyes start shining – so a healthy lifestyle means prettier looks, too!
